INTRODUCTION

Early American Coinage

The first mint established in this country was authorized by the General Court of Massachusetts in 1651 and began operation in Boston the following year. The NE, willow, oak and pine tree coins were the product of this mint. The Bermuda coinage antedates the above by over thirty years but could hardly have had any circulation in the colonies.

In 1658 the Lord Baltimore coins were planned for Maryland but never achieved any circulation as they were all short weight.

William Wood received a Royal Grant to strike copper coins for use in the colonies and his *Rosa Americana* pieces undoubtedly had some circulation here as well as his *Hibernia* halfpence which were not accepted in Ireland.

After the Revolution several of the states established their own mints, those of New Jersey and Connecticut having quite an extensive coinage of great interest to present day collectors.

The various experimental and trial pieces speak for themselves as little is known about them, except that a large proportion of them originated in England, evidently as an effort to secure contracts for the preparation of dies for a new coinage.

To the collector who acquires a really scientific interest in this series Crosby's "Early Coins of America" is the only standard work and the sixty years since the publication have added very little to the general knowledge of the subject.

Establishment of the Mint

The United States Mint was established in Philadelphia by an act of Congress dated April 6, 1792 and began operations in March of the following year.

The cents and half cents were struck in 1793, the silver dollar, half dollar and half dime in 1794 and the eagle and half eagle in 1795. In 1796 the quarter eagle, quarter dollar and dime were first coined. The eagle was the gold unit and had a standard weight of 270 grains, with a fineness of 916²/₃. The dollar was the silver unit and had a standard weight of 416 grains with a fineness of 892.4. The other gold and silver coins were in proportion. It was soon discovered that these units were undervalued and either being exported or sold as bullion, therefore in 1804 the coinage was stopped, only the smaller coins being continued. The law of 1834, amended in 1837, reduced the weight of the eagle to 258 grains of a fineness of 900 and this new coin was first issued in 1838. The law of 1837 reduced the weight of the silver dollar to 412½ grains also of a fineness of 900. The law of 1834 having placed too low a valuation on silver many of the fractional coins were sold for bullion so that the law of 1853 reduced the weight of the half dollar to 192 grains making all the fractional silver coins subsidiary.

The act of 1873 made necessary an increase in the weight of the half dollar to 192.9 grains in order to conform with the authorized weight of 12.5 grams.

Private Gold Issues

The gold coins struck by private assayers and mints in the United States form one of the most interesting series in the numismatics of our country. The first of these were issued by Templeton Reid, who established a mint near the gold mines in Lumpkin County, Georgia. The next coins

were those struck by the Bechtlers, Christopher and August, from 1831 to 1842 or later. Their mint in Rutherford, N. C., struck pieces from the gold of Georgia and North Carolina to the amount of over two million dollars.

Upon the discovery of gold in California and the influx of prospectors and traders there was an immediate need for a medium of exchange other than the unwieldy bags of gold dust. Several firms struck coins in 1849 and the State Assay Office of California, with Frederick D. Kohler as State Assayer, began stamping ingots early in 1850; a few of these still exist. In the latter part of 1850 the firm of Moffat & Co. was designated as United States Assay representatives and Augustus Humbert of New York was appointed United States Assayer to place the government stamp upon the ingots produced by Moffat & Co. This business was in 1852 conducted under the name of the United States Assay Office.

The Mormon coinage grew out of the same necessity and appeared early in 1849. It did not, however, compare with the California coinages in actual intrinsic value. The firm of Clark, Gruber & Co. in Denver coined gold from the Colorado mines and produced over \$500,000 worth in 1860 and 1861. The Parsons and Conway companies were much smaller operators.

Way up in Oregon the same need for a medium of exchange produced the two pieces struck by the Oregon Exchange Co. in 1849.

Colonial and Continental Notes

The cuts used to show the vignettes on the Continental Notes are reproduced from the Scott Catalogue of 1894. The large number of Colonial issues never seen by collectors and the general character of our work make it imperative that we only describe the issues usually obtainable.

United States Notes

We have made radical changes in this part of the catalogue, omitting the tables of signature and seal combinations including all values. In place of these tables we are giving a specialized list of the \$1, \$2 and \$5 notes with prices of the varieties usually to be had.

Fractional Currency

These notes, the issue of which was brought about by the necessity of a small medium of exchange, have always been a favorite with collectors. Many of them are unredeemed and still available. Our list is one of the most highly specialized ever published.

Confederate and Southern State Notes

The catalogue gives a complete list of the types of these interesting notes with prices for all. The rarities are not often available and a complete collection is difficult to secure.

Compiler's Note

The Standard Catalogue has undergone a thorough revision this year and the editors feel that the prices represent a fair and impartial representation of the actual retail values of the coins and notes as listed. Future editions will be enlarged and added to along the lines demanded by collectors.

Mottoes On Our Coins

The motto "E Pluribus Unum" first appears on the half eagle of 1795 being featured on the scroll above eagle, as copied from the Great Seal of the United States. "In God We Trust" first appears in 1864 when the Civil War had stirred up a great religious sentiment in the country.

Signatures on Coins

The mint engraver, J. B. Longacre, placed his initials on the double eagle of 1849 and on the Three Dollar piece issued in 1854, in both instances on the truncation of the neck. The 1864 and subsequent issues of the bronze cent have L on the ribbon hanging from bonnet.

The engraver, Geo. T. Morgan, placed an M on both sides of his design for the silver dollar of 1878. This shows on the truncation of the bust and on the wreath ribbon of reverse.

Charles E. Barber engraved a B on the truncation of the Liberty head on the 1892 silver dime, quarter and half dollar. The 1907 double eagle bears the initials A S G (Augustus St. Gaudens) under the date although he did not sign the eagle.

The new 1908 coinage of quarter and half eagles shows the initials B.L.P. (Bela L. Pratt) under the Indian head. The 1921 Peace dollar has the letter F under the head (Anthony de Francisci). The 1916 half dollar bears the initials of A. A. Weinman in monogram in the lower field of the reverse, also on the obverse of the dime.

The letter M appears at the base of the right portal on the 1916 quarter dollar and is the initial of Herman MacNeil.

James E. Fraser, the designer of the buffalo nickel placed an F under the date.

The Lincoln Cent of 1909 had the initials V.D.B. (Victor D. Brenner) on the reverse but being rather conspicuous they were removed before the end of the year, but later replaced under the shoulder in 1918.

Arrows At Date

The arrows on either side of date on coins of 1853, 1854 and 1855 indicate the reduction in weight while those on the coins of 1873 and 1874 indicate the slight increase.

The Condition of a Coin

PROOF—Specially struck coins with a mirror-like surface sold to collectors at the United States Mint.

UNCIRCULATED—A new coin never in circulation.

VERY FINE—From circulation but no signs of wear.

FINE—Slightest sign of wear but still an attractive piece.

VERY GOOD—Somewhat worn but still desirable.

GOOD—Worn but type all clear.

FAIR—Considerably worn and type does not all show.

Proof Coins

Proof coins, in all metals, were first struck at the mint for collectors in 1858. They have a mirror-like surface unlike the regular issues. All such pieces were originally sold at a premium. The U. S. mint abolished this practice in 1915 but resumed it again in 1936.

Prices Quoted

Condition governs the price of a coin and some pieces are rarely met with in fine state; for this reason there may be a wide variation in price between good and fine preservation. This is especially true of the early American pieces and the first types of cents and half cents. An attractive color and appearance also adds to the value of such coins.

The prices quoted on private gold coins are for fine cabinet specimens and on the regular United States gold issues for coins in very fine condition. The early Colonial and Continental notes have presented a problem due to the poor condition in which many of them are found. "Good" represents average decent condition. "Fine" represents unusual condition, really very fine as condition is usually expressed, in the case of the more common notes even finer.

The price attached to Confederate and Southern State currency is for very fine notes.

SPECIAL NOTICES

Guarantee

Every coin sold by us is guaranteed a genuine original.

Prices

The quotations given in this catalogue are based on our present supply of coins and are subject to change without notice. It is not to be presumed that the publishers are prepared to supply all the coins listed in this catalogue but only such pieces as may be in stock. Every effort is made, however, to keep as complete a series as possible.

Legends on American Colonial Coins

Sixty years ago there was published in the COIN COLLECTOR'S JOURNAL a list of the translations of the mottoes and legends used on early Colonial coins. Though long out of print it is a useful list and it is with pleasure that we republish it at this time. A number of legends and translations have been added.

AMERICA INIMICA TRYANNIS — America, hostile to tyrants. (Confederatio Cents.)

AUCTORI CONNEC.—By authority of Connecticut.

AUCTORI PLEBIS—By authority of the people. (General.)

The initials on reverse of 5 Dollar piece, K.M.T.A.W.R.G.S. stand for the members of the firm—Kilburne, Magruder, Taylor, Abernethy, Wilson, Rector, Gill & Smith. Evidently some of the partners had dropped out when the 10 Dollar piece was struck.

MERCHANTS TOKENS

OR

STORE CARDS

The majority of the tokens listed were struck between the years 1820 and 1860 and many of them were actually used as money in the localities in which they circulated. There are many varieties and types. We have only attempted to give an approximate list of the merchants. The usual metals are copper and brass although some were struck in silver or composition. Nearly all are of the size of the old cent.

CIVIL WAR TOKENS AND CARDS

Also Known As

COPPERHEADS AND REBELLION TOKENS

Arrangement by Joseph Barnet, Brooklyn, N. Y.

These very interesting pieces were privately issued from 1861 to 1864, and most of them were current, owing to the scarcity of minor coins.

They were issued in 24 States and 396 Towns, and struck in copper, brass, nickel, copper nickel, white metal, lead, zinc, tin and silver, but copper was chiefly used.

There are 8,810 different varieties known at present, (1,234 tokens of patriotic design and 7,576 cards). There are 114 with the head of Washington, and 47 tokens and cards with the head of Lincoln.

ENCASED POSTAGE STAMPS

Patented by J. Gault, 1862

The great scarcity of small change during the Civil War made these stamps, encased in a metal frame, very popular. Many concerns used them as an advertising medium and placed their names on the back in embossed letters.

Prices are for very fine specimens with mica intact.

* In 1907 the size and weight of the silver coins were reduced. In 1930 the size of the 5 Centavos was made smaller as it was the same size as the reduced silver 20 Centavos.

** This date comes with the obverse of the 20 Centavos—this can be distinguished by the shield which is larger and the date is smaller.

*** This date has the obverse of the five centavos, no dies having been sent from Philadelphia to Manila for this year and an unexpected order for 20 Centavos received at the mint

NOTE.—Unsigned notes printed on blue paper are occasionally met with; they were supplied to the banks to compare with suspected bills. The series of May 20th, 1777, and April 11, 1778, were withdrawn, and after destroying \$12,848,268, the remainder was repudiated by the government on account of numerous counterfeits in circulation, although they are quite easy of detection.

SECOND GENERAL ISSUE

October 10, 1863 to February 23, 1867

These and all following issued under Act of March 13, 1863. All of the numbers under this head have the bust of Washington in bronze oval frame in centre of face of note and the value 5, 10, 25 or 50 surcharged in bronze on back. The varieties are distinguished by the bronze letters and figures, or their absence, on the back, and the kinds of paper used. The latter surcharge is in addition to the value imprint.

COINAGE FOR THE CALENDAR YEAR 1936.

Following is the number of pieces of the different denominations coined at the mints of the United States during 1936, as reported by the Bureau of the Mint, Washington, D. C.:

	Philadelphia.	San Francisco.	Denver.
Half dollars, regular	12,617,901	3,884,000	4,252,400
Commemorative	346,215	158,111	233,138
Quarter dollars	41,303,837	3,828,000	5,374,000
Dimes	87,504,130	9,210,000	16,132,000
Five cents	119,001,420	14,930,000	24,814,000
One-cent	309,637,569	29,130,000	40,620,000

Coinage executed by the United States Mints for foreign governments:

Costa Rica, 350,000 pieces; Cuba, 16,000,000 pieces; Nicaragua, 2,200,000 pieces; San Salvador, 2,500,000 pieces; Venezuela, 11,300,000 pieces.

Domestic Coin Manufactured by Mints of the United States Since Organization to Include the Year 1935

Coinage during the early years is not susceptible of exact statement by years of actual date on coin, the registry of annual coinage being of coin delivered by the coining departments of mints within the given year, and these deliveries not having been invariably completed within the year of the date on coin as now required.

The following pages are reprinted from the pamphlet "Domestic Coin Manufactured by Mints of the United States" compiled by the office of the Director of the Mint.
